We are the world's largest astrology and devotion ecosystem connecting users and astrologers

Platform

- Global platform
- Multi-app platform
- Free engagement + paid engagement
- E-commerce platform

Astrologers

20K+ astrologers
100% captive supply
All forms of astrology
80%+ astrologer retention

Users

1.5Mn+ monthly paid users
2Mn+ new user registrations
High repeat use case
High trust

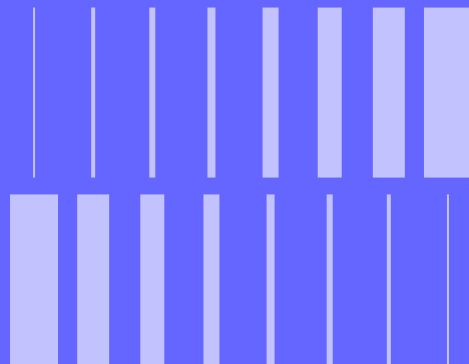

Huge monetization

High engagement

High trust

- Astrotalk: the world's largest full-stack astrology and devotion platform, connecting users with a captive network of 20 K+ vetted astrologers for on-demand guidance.
- Astrotalk: sells pay-per-minute 1:1 and live astrology sessions, plus digital remedies (gemstones, e-pooja, crystals) and D2C devotional products.
- Astrotalk: serves individual consumers seeking personal insights on relationships, career, health and more—1.5 M+ monthly paid users across India (tiers 1–3) and growing international audiences.

[Return to Index](#)

Key Findings

Key Findings

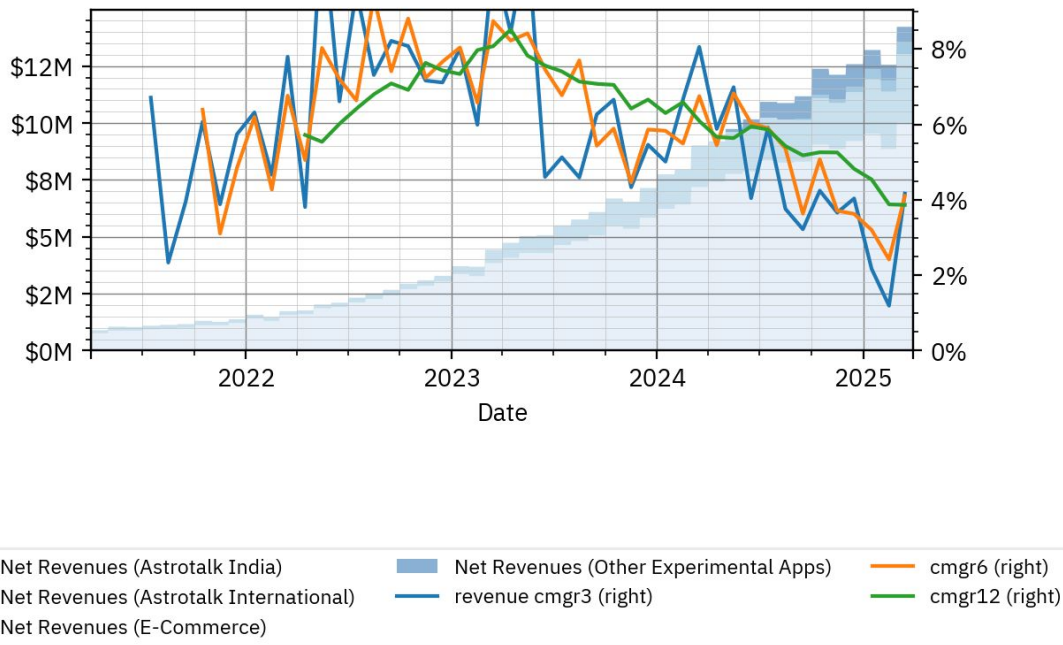

[AstroTalk](#) shows improving margins and strong operational efficiency but newer revenue lines have yet to take off and overall revenue growth remains subpar.

	Overall Quality of Growth
	Growth - March 2025 revenue was \$14.2M (1.6x YoY), below the median for a company of their scale. Growth was driven primarily by India and International platforms, while E-commerce and Experimental lines remain flat generating ~ \$0.5-0.7M monthly.
	Gross Margin - Overall GM climbed from 55.1 % to ~60.3% over the past year, powered by the company's international business which posted GM ~70 %+ margin in the latest month (57.6% Local, 66.2% Experimental, 60.6% ECommerce.
	Operational Efficiency - Operating margin of 30.6% was top decile showcasing exceptional operating efficiency. Much of this is thanks to tight cost control-COGS at 40% of revenue, S&M at 25%, and all other overhead at just 4%.
?	Retention - More data needed.
?	Unit Economics - More data needed.
→	What Could Go Right
	Accelerated International Roll - out - Localizing content and marketing outside India could double International revenues (from ~21% to ~40% of mix), driving a 3-4 pp lift in blended gross margin and unlocking a step-change in growth.

Key Findings

Growth has mainly been driven by increasing Local and International revenue while newer lines have yet to take off

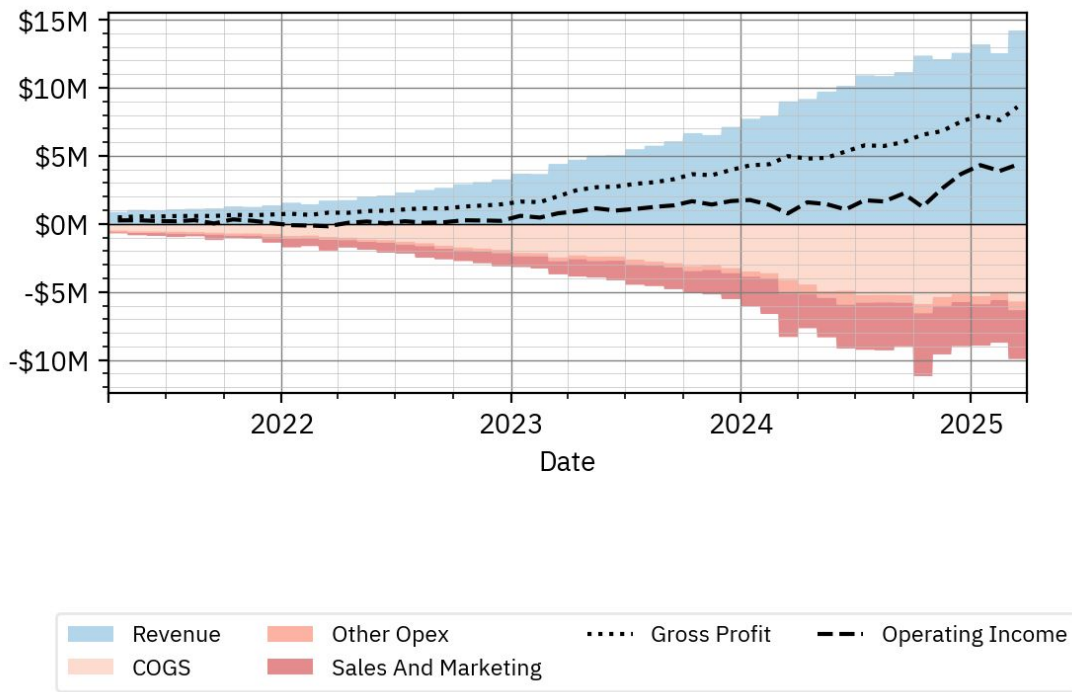

- In March 2025, Revenue was \$14.2M (\$171.0M run rate).
- Revenue CMGR 3/6/12 was 4.2/4.1/3.9%.
- Implied year-over-year growth was 1.6/1.6/1.6x.

Operating margin was top quartile

- In March 2025, Annualized Revenue (Rolling Q) was \$160.2M.
- Operating Margin (Rolling Q) was 31.4% (top quartile).
- Compared with other consumer companies at similar revenue. Live benchmarks are available online for [marketplace](#) and [consumer](#) categories.

- In March 2025, Total Revenue was \$14.2M (typical performance) (\$171.0M run rate).
- COGS was \$5.7M.
- Gross Profit was \$8.6M (\$103.1M run rate).
- Gross Margin was 60.3% (top quartile).
- Opex breakdown: Sales And Marketing of -\$3.6M, and Other Opex of -\$643.9k.
- Operating Income was \$4.4M (\$52.3M run rate).
- Operating Margin was 30.6% (top quartile).
